

Blockchain

Blockchain

Blockchain is a distributed ledger technology that allows for secure, transparent, and tamper-proof transactions.

Blockchain is a distributed ledger technology that allows for secure, transparent, and tamper-proof transactions. It is a decentralized system where transactions are recorded in blocks and linked together in a chain. The data is stored across multiple nodes in a network, making it difficult to alter or delete. This technology has applications in various industries, including finance, supply chain, and healthcare.
