

Blockchain

Blockchain

Blockchain is a distributed ledger technology that allows for secure, transparent, and tamper-proof transactions.

Blockchain is a distributed ledger technology that allows for secure, transparent, and tamper-proof transactions. It is a decentralized system where data is stored in blocks and linked together in a chain. Each block contains a list of transactions and a cryptographic hash of the previous block. This makes it difficult to alter the data once it has been recorded.

Blockchain is a distributed ledger technology that allows for secure, transparent, and tamper-proof transactions. It is a decentralized system where data is stored in blocks and linked together in a chain. Each block contains a list of transactions and a cryptographic hash of the previous block. This makes it difficult to alter the data once it has been recorded.
